

## Media release

# Gas intersected at Dombey-1

---

Date Tuesday, 15 October

---

Beach Energy says that it has intersected gas from the Dombey-1 conventional gas exploration well in PEL-494 (Beach 70% operator, and Cooper Energy 30%) in the Penola Trough.

While further analysis will be undertaken to confirm the size of the resource, the initial results are encouraging with a discovery made in the primary target, the Pretty Hill Formation.

The well has now been drilled to 3,384 metres and further evaluation is ongoing.

Dombey-1 is being drilled with the assistance of a \$6.9 million PACE grant from the South Australian State Government.

For more information, members of the public can visit the Beach Penola office at 48 Church Street, Penola, or visit [beachenergy.com.au/sa-otway-basin](http://beachenergy.com.au/sa-otway-basin).
