

Type	Service Name	Description	Price Structure	Pricing Methodology
Bass Pakenham Pipeline Services	Interruptible Forward Haul transport	The Interruptible Forward Haul Service will only be available on a Day if Service Provider, in its absolute discretion, determines that sufficient Capacity remains after all of the agreements for Pipeline Services with a higher priority than the Interruptible Forward Haul Service have been satisfied by Service Provider	Interruptible Forward Haul Service is charged as tariff x quantity of gas measured or determined as having been delivered to User on account of the Interruptible Forward Haul Service on each Day in the relevant Month.	The standing price has been calculated from the foundation tariff (which was \$0.28 in 1 January 2022 dollar terms) adjusted by Escalation Factor (formula specified below).
	Interruptible Back Haul transport	The Interruptible Back Haul Service will only be available on a Day if Service Provider determines, in its absolute discretion, that sufficient Capacity remains after all of the agreements for Pipeline Services with a higher priority than the Interruptible Forward Haul Service have been satisfied by Service Provider	Interruptible Back Haul Service is charged as tariff x quantity of gas measured or determined as having been delivered to User on account of the Interruptible Back Haul Service on each Day in the relevant Month.	The standing price has been calculated from the foundation tariff (which was \$0.1974 in 1 January 2022 dollar terms) adjusted by Escalation Factor (formula specified below).

*Only available for current Receipt and Delivery Points

Annual inflation adjustment

Tariff will be adjusted on 1 January of each calendar year (commencing in the year set out in the relevant Commercial Terms Schedule) by multiplying them by the **Escalation Factor** for that year, and the adjusted rates will then apply on and from that date until again adjusted

$$\text{Escalation Factor} = \left(1 + \frac{CPI_a - CPI_b}{CPI_b} \right)$$

where:

- (i) CPI_a means CPI in respect of the September quarter immediately preceding the relevant adjustment date;
- (ii) CPI_b means CPI in respect of the September quarter that is 12 months before the quarter to which CPI_a relates;
- (iii) if CPI_a is less than CPI_b , then $(CPI_a - CPI_b / CPI_b)$ is deemed to be zero; and
- (iv) CPI means the consumer price index (weighted average for 8 capital cities, all groups) published from time to time by the Australian Bureau of Statistics or if that index is suspended or discontinued or if the basis of assessment is changed so that it no longer accurately reflects changes in the prevailing levels of prices substantially in the same manner as it did prior to the change in basis, then an alternative index that reflects movements in the cost of living in all of the capital cities of Australia will be selected by Service Provider and substituted for the relevant index for the period of the suspension or, in the case of a discontinuance of the CPI or a material alteration in its calculation, on a permanent basis and the calculation of the adjustments will be made using such alternative index as though it was the CPI.
